

USE & CARE INSTRUCTIONS

EASY TO FILL, EASY TO CLEAN

Wide top allows you to fill and clean with ease.

You're holding a new type of bird feeder made by people who really love birds.

After talking with birders all around the country, we took what they know and combined it with what we know to make feeders that are better for you and better for the birds. All our feeders are easy to fill, easy to clean and our Stay Full Port® provides constant food at each perch. This feeder is designed to keep squirrels out so you can Feed Birds, Not Squirrels!

Created to bring more joy and birds into your life.

Visit our website for feeding & cleaning tips!

Filling the Feeder

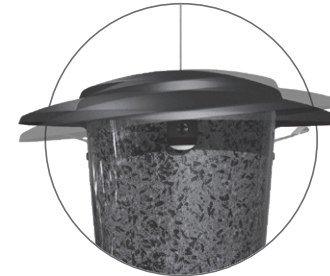

Step 1: Remove the locking roof by gently pulling out on the metal clips below the roof and lifting.

Step 2: Pour seed into the wide top.

Step 3: To lock the roof back onto the feeder, gently pull on the metal clips, align roof with plastic tabs on feeder and release. Your feeder is now ready to hang. The locking metal roof keeps squirrels out of your feeder.

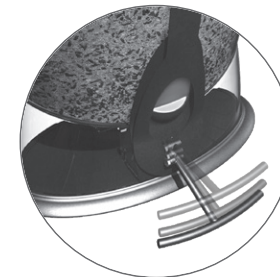

Cleaning the Feeder

Remove the locking roof by gently pulling out on the metal clips below the roof and lifting. Hand wash with warm water and a mild antibacterial soap. Drain holes in the base will allow water to flow through and clean the bottom. We recommend not removing the base for cleaning. Rinse thoroughly and let dry completely before refilling with seed.

Hinged Roof

The hinged roof tilts with the weight of a squirrel and closes both ports.

Squirrel-Proof Ports

Two integrated metal perches are spring loaded to close both ports from the weight of a squirrel.

TENSION ADJUSTMENT PIN

Choose Your Birds®

Use the tension adjustment pin below the perch to Choose Your Birds®. Use your feeder with the pin in the down position for smaller birds. Larger birds can perch with the pin in the up position.
