SECTION 4. FIRST AID

Eyes: Immediately flush eyes with copious amounts of clear, cool running water for a minimum of 15 minutes. Hold eyelids apart during the flushing to ensure rinsing of the entire surface of the eyes and lids with water. Contact a physician if irritation persists.

Skin: Immediately flush all affected areas with large amounts of clear water for at least 15 minutes. Washing with a mild soap and water is more effective for removal of contamination than just water. Remove contaminated clothing. Do not attempt to neutralize with chemical agents. Wash clothing before reuse. If skin irritation persists, contact a physician.

Ingestion: Immediately dilute the swallowed product by giving large quantities of water and induce vomiting, preferably by giving Syrup of Ipecac. Never give anything by mouth to an unconscious person. Contact a physician immediately.

Inhalation: Remove victim to fresh air. If breathing has ceased, clear the victim's airway and start mouth-to-mouth artificial respiration. If breathing is difficult, give oxygen. Contact a physician immediately.

Note to Physician: Treat symptomatically. For additional information, contact your local or state Poison Control Center.
